

Quick Start Guide To:

Importing Leads from the Lead Builder

This Quick Start Guide will walk you through the steps of Importing Leads using the Swiftpage Lead Builder.

- 1. Select the Leads button from the Swiftpage Connect portal.

- 2. At the top of the page, Click List. You will receive a message when your Leads (Data Bridge) import is available. Select Yes to start the import lead process.

The screenshot shows the Swiftpage List Manager interface. A modal dialog box titled "Data Bridge import available." is centered on the screen. The dialog contains the text: "You have a file available for import from the Data Bridge. Would you like to go to the import screen now?" with "Yes" and "No" buttons. Below the dialog, the interface shows a "Manage Contacts" section with a "Current Filter" box containing "Group Name: 'All'", "Rule: All Contacts", and "Contacts: 1". There are also filter options for "Filter by Group" (set to "All") and "Use All Contacts with a Field Value" (with "Email Address" and "Contains" selected). A table of contacts is visible at the bottom, with columns for First Name, Last Name, Email Address, Title, Company, and Date Added. The first row shows contact information for "AsSP33111" with email "aschaef@swiftpage.com" and date "11/09/2011".

- Under the Import List Tab, you'll want to select the option to import From a Contacts file on the Data Bridge. You will see your named Lead list under the dropdown menu. Click Submit.

The screenshot shows the 'Swiftpage List Manager' interface. At the top, there are navigation buttons: Home, Contacts, Groups, List, Send Email Blast, Update Drip Marketing, and Lead Builder. Below this is a sub-menu with 'Import List' selected, along with 'Import Survey', 'Export List', 'Field Maps', and 'List Options'. The main content area has two radio buttons: 'Use My List' (selected) and 'Use Sample List'. The title 'Import List' is centered. There are two main options for importing: 'From a CSV file' and 'From a Contacts file on the Data Bridge'. The 'From a Contacts file on the Data Bridge' option is selected. It shows a dropdown menu with the text 'Food in Englewood, CO, Uploaded Nov 9, 2011 at 12:59:12P' and a 'Remove file from Data Bridge' button. At the bottom, there are 'Submit' and 'Cancel' buttons.

- The system will then check the list for duplicates. You can choose to ignore the message, replace the previous contact with the new information, or to skip importing that contact. (**Note:** The system detects duplicates based on name and you may therefore wish to compare other information, such as the company field, before making your selection.)
- You will then have the option to group your contacts as a new group in the List Manager, add them to a pre-existing group, replace a previous group with the new contacts, or to add them to the List Manager without grouping them. After you have made your selection, click on Submit. The Leads List has now been uploaded to your List Manager.

Import Options

Your List has been imported successfully.

Step 1: Groups can be used to Send Email or Update Drip Marketing. Choose a Group option below:

Create a Group with this name:

Add to an existing Group:

Replace an existing Group:

Do not Group my Import

Step 2: An optional Tag can be added for each of your imported contacts. The tag will be added to the selected field.

Enter a Tag (optional): Add to Field:

Current Filter: ?

Group Name: "Food in Englewood, CO"
 Rule: The contacts that are in the group (???)
 Contacts: 9
[Advanced Filter Actions >>](#)

Select a Filter

Filter by Group: Food in Englewood, CO ▾

Use All Contacts with a Field Value:

Email Address ▾ Contains ▾
